1. Introduzione

Il testing di unità rappresenta la fase di testing in cui si assicura che le componenti sviluppate funzionino in isolamento. Questo documento ha il compito di identificare la strategia di testing di unità per il sistema HardShip. In particolare, saranno specificate le componenti da testare e il modo in cui il testing dovrà essere eseguito. Lo scopo del documento è quello di riportare l'esecuzione del testing unitario e di verificare la presenza o meno di fault.

2. Details

2.1. Overview dei risultati dei test

Non sono stati riscontrati fault nelle componenti del sistema HardShip. Per informazioni dettagliate sugli item testati e sui risultati si faccia riferimento al paragrafo successivo.

2.2. Dettagli dei risultati degli unit test HardShip

2.2.1. Junit AcquistaTest

2.2.2. Junit AllNewsTest

2.2.3. Junit DeletelItemTest

2.2.4. Junit HomeTest

2.2.5. Junit InserisciFeedbackTest

2.2.6. Junit LiveSearchTest

2.2.7. Junit LoginAdminTest

2.2.8. Junit LoginTest

2.2.9. Junit LogoutTest

2.2.10. Junit NavBarTest

2.2.11. Junit NotizieTest

2.2.12. Junit RegistrazioneUtenteTest

2.2.13. Junit RichiestaAlbumTest

2.2.14. Junit SearchTest

2.2.15. Junit UploadAlbumTest

2.2.16. Junit UploadNewsTest

2.2.17. Junit VisualizzaAlbumTest

2.2.18. Junit VisualizzaNewsTest

3. Coverage dei test eseguiti
